

LUXURY ASSET STEWARDSHIP

Field Assessment Checklist

On-site baseline review for APRISM property stewardship.

Use on tablet or print. Record photo numbers beside notable findings.

Managing What Matters.

APRISM LLC | Park City + Summit County, Utah

01
Site, Exterior & Envelope

RATING: G = Good M = Monitor S = Service Recommended P = Priority

Observation / Item	G	M	S	P	Photo #
Site drainage, grading, erosion, retaining walls, and visible water paths					
Driveway, walkways, stairs, railings, exterior lighting and trip hazards					
Roof surfaces visible from grade, flashing, penetrations and snow-load concerns					
Gutters, downspouts, heat tape, drains and discharge locations					
Exterior walls, siding, stucco, stone, trim, sealants and paint condition					
Windows, exterior doors, weather seals, locks and thresholds					
Decks, balconies, patios, exterior structures and guardrails					
Garage doors, openers, seals, sensors and exterior access					
Visible foundation conditions, window wells and crawlspace access					
Snowmelt, heated surfaces and winter exposure points					
Trees/limbs, landscaping contact with structure and wildfire defensible-space concerns					
Irrigation components, hose bibs, exterior faucets and freeze protection					
Exterior cameras, sensors, gates and access-control hardware

02
Heating, Cooling & Mechanical

RATING: G = Good M = Monitor S = Service Recommended P = Priority

Observation / Item	G	M	S	P	Photo #
Furnaces / air handlers: visible condition, filters, service labels and access					
Boiler / hydronic system: pressure, leaks, manifolds, zone labels and visible corrosion					
Radiant floor / snowmelt system controls and visible condition					
Thermostats, zoning controls and remote-monitoring capability					
A/C or heat-pump condensers: clearance, visible damage and seasonal protection					
Humidifiers / dehumidifiers and condensate drainage					
Mechanical room housekeeping, combustible storage and equipment access					
Flue / venting components visible at equipment					
Fuel source, propane/oil equipment and service information					
Generator / transfer switch: service record, exercise status and access					
Mechanical service records / filter sizes / replacement schedules documented					

FIELD NOTES / PHOTO REFERENCES

03
Plumbing & Water

RATING: G = Good M = Monitor S = Service Recommended P = Priority

Observation / Item	G	M	S	P	Photo #
Main water shutoff location identified and operable/accessible					
Water heater(s): age, visible leaks/corrosion, drain pan and service history					
Pressure-reducing valve / expansion tank / pressure observations					
Visible supply piping, valves, manifolds and leak indicators					
Visible drain/waste piping and signs of leakage or staining					
Sump pump / ejector / floor drains and backup power considerations					
Water softener / filtration / treatment equipment and consumables					
Well equipment / pressure tank / controls if applicable					
Septic system records / alarm / service history if applicable					
Fixtures: sample faucets, toilets, showers, tubs and exterior hose bibs					
Leak detection sensors, automatic shutoff valves and remote alerts					
Freeze-risk locations: crawlspaces, garages, exterior walls and vacant areas					

FIELD NOTES / PHOTO REFERENCES

04
Electrical, Life Safety & Security

RATING: G = Good M = Monitor S = Service Recommended P = Priority

Observation / Item	G	M	S	P	Photo #
Main electrical service panel location and clear access					
Panel labeling quality and obvious visual concerns at covers/enclosures					
Subpanels / disconnects / specialty equipment panels documented					
GFCI / AFCI protection locations noted where visible					
Smoke alarms: quantity, location, apparent age / battery status					
Carbon monoxide alarms: quantity, location and apparent age					
Fire extinguishers: location, type, inspection/condition					
Fire sprinkler / suppression system service information if applicable					
Emergency lighting / egress route concerns where applicable					
Security system, cameras, sensors and monitoring provider documented					
Internet / network equipment, UPS battery backup and remote access needs					
Smart-home controls, hubs, AV racks and critical equipment ventilation					

FIELD NOTES / PHOTO REFERENCES

05
Interior, Appliances & Amenities

RATING: G = Good M = Monitor S = Service Recommended P = Priority

Observation / Item	G	M	S	P	Photo #
Ceilings/walls: visible water staining, cracking or condition changes					
Floors, stairs, rails and high-wear areas					
Windows/doors: operation, locks, seals and condensation evidence					
Kitchen appliances: general condition, water lines and service history					
Laundry equipment: hoses, drains, venting and shutoff access					
Fireplaces / inserts: visible condition and service records					
Hot tub / spa: water, cover, equipment bay and service schedule					
Pool equipment / covers / winterization if applicable					
Sauna / steam shower / specialty bath equipment					
Wine room / refrigeration / specialty climate-controlled spaces					
Elevator / lift service dates and emergency contact information					
Garage equipment, EV chargers, compressors and specialty systems					
Motorcycle / vehicle collection areas, chargers, tenders and storage conditions					

FIELD NOTES / PHOTO REFERENCES

06

Vendors, Records & Stewardship Controls

RATING: G = Good M = Monitor S = Service Recommended P = Priority

Observation / Item	G	M	S	P	Photo #
Current vendor list complete with primary contacts					
Service contracts, warranties and maintenance agreements gathered					
Equipment model / serial numbers documented for critical systems					
Owner manuals and property records centralized					
Utility account / emergency contact list established					
Seasonal open / close procedures documented					
Arrival preparation preferences documented					
Departure / vacancy checklist established					
Housekeeper / vendor access protocol documented					
Known deferred-maintenance items logged					
Active projects / bids / contractor commitments documented					
Insurance-sensitive conditions or owner reporting preferences noted					
Remote monitoring opportunities identified					
Recurring maintenance calendar priorities identified					

FIELD NOTES / PHOTO REFERENCES

07
Final Walkthrough & Priority Review

RATING: G = Good M = Monitor S = Service Recommended P = Priority

Observation / Item	G	M	S	P	Photo #
Owner concerns reviewed against field observations					
Immediate life-safety / property-damage priorities identified					
Items requiring licensed specialist evaluation identified					
30-day maintenance priorities identified					
Seasonal priorities identified					
Long-term capital / replacement items identified					
Recommended monitoring / sensors / documentation improvements identified					
Vendor gaps / duplications identified					
Photography complete for significant conditions and major systems					
Property record information complete enough to build APRISM baseline					
Recommended APRISM membership / stewardship cadence determined					

FIELD NOTES / PHOTO REFERENCES
